Designed by the disabled	Understanding your needs from experience
Low maintenance with no hydraulics	Little or no repair costs. Dependable in all weather no leaks or freeze ups.
3 year warranty (5 year limited)	40+ years of service standing behind our products
Manual crank down on the motor	Back up feature, Never stranded if your vehicle electrical system fails
4 Models available Vans-Minivans Motor homes- Basement Model Motorhomes	Fits your life style needs. Making life accessible in vans and most minivans, and motorhomes.

*NHTSA's National Center for Statistics and Analysis Sept. 1997 report

Designed by the disabled, this lift is simple, quiet, user-friendly and strong. The Superarm is the safest lift on the market*. It is reliable, low maintenance and all electric. No platform to block your doors. Less Space is required for parking. Affordable requiring minimal modification so that the vehicle resale value is retained. Purchased by the V.A. for those who qualify. Allows you the freedom to choose vehicle conversions you want for your life style and comfort rather than conversions to fit your mobility equipment. Each lift comes with mountain climber webbing straps, which attach to the user's wheelchair. The webbing will allow the chair to tip slightly back, giving head clearance as the user passes through the door.
